PROFILE

Frontend Developer with 2 years of experience, specializing in web applications. Proficient in HTML, CSS, JavaScript, and frameworks like ReactJS and NextJS. I have contributed to building scalable CMS solutions with tools like Strapi and Appsmith. I am now aiming to transition into Fullstack Developer to build comprehensive web applications that leverage both Frontend and Backend technologies.

SKILLS

Frontend Development	Good HTML, CSS, SCSS, JS, TS, ReactJS, NextJS, Antd, Axios
State Management	Good Redux, Zustand
CMS	Strong Strapi, Appsmith
SEO	Good Sitemap, JSON-LD
English	Proficient in reading and writing English, with basic conversational skills. TOEIC score: 535

EDUCATION

IUH - Industrial University of Ho Chi Minh City

Sep 2019 - Sep 2023

Major: IT/ Software Engineer

GPA: 3.14

Description: During my studies, I gained experience in developing multi-platform applications, including Winform, web, and mobile. I acquired strong knowledge in JavaScript, which I applied to build web applications using ReactJS, mobile applications with React Native, and backend services with ExpressJS. After about a year of working, I was honored to be invited back to school to teach new technology. Show students how to use AWS features such as EC2, S3, and Dynamo DB, and how to create a simple CRUD API with ExpressJS.

Projects:

• WeChat - Realtime ChatApp

- Description: The Real-Time Chat App gets ideas from Zalo. With main features such as making friends, creating groups, messaging,...
- Technologies: ReactJS + React Native + ExpressJS + MongoDB + Socket
- Team size: 5 - 2 Mobile, 2 Frontend, 1 Backend
- Position: Mobile, Backend
- Responsibilities:
 - Collaborated with team members to analyze and design the system
 - Collaborated with another member to develop a backend and mobile app
- Gains:
 - Highly appreciated by subject instructors. Finish the course with a 4.0 GPA
- Video Demo: <https://www.youtube.com/watch?v=Gap-4veq2eU>
- Github:
 - Backend: <https://github.com/iamtun/cmn-mechat-server>
 - Mobile App: <https://github.com/iamtun/cnm-mechat-app>

• T&T Healthcare

- Description: A healthcare application with two platforms, web, and mobile, facilitates doctor appointments and enables communication via chat and video calls. Integrate health monitoring and evaluation system
- Technologies: ReactJS + React Native + ExpressJS + MongoDB + Socket + Zego Cloud
- Team size: 2 - 1 Frontend, 1 Mobile + Backend
- Position: Mobile, Backend
- Responsibilities:
 - Collaborated with another member to analytics and design system
 - Communicate with Frontend to integrate APIs for the website
- Gains:
 - Received good evaluation by instructors with a score of 3.5 GPA for graduation project
- Video Demo: <https://www.youtube.com/watch?v=mOEqSjYPr5c>
- Github:
 - Backend: <https://github.com/iamtun/heathcare-backend>
 - Mobile: <https://github.com/kltN-heathcare-app-2023/heathcare-app-native>

WORK EXPERIENCE

Tiasa Tech JSC

Dec 2022 - Present

Frontend Developer

Project: Dicamon

- Description: QA web and book web support students from grade 6 to grade 12 in Vietnam.
- Technologies: NextJS + Sass + Antd + Redux + Firebase + Strapi
- Team size: 5 - Frontend, Backend, Designer, Product Manager, Tester
- Responsibilities:
 - Collaborated closely with UX/UI designers to transform design concepts into fully functional web applications.
 - Developed a robust Content Management System (CMS) using Strapi to efficiently manage books, word games, and other educational content.
 - Integrated a custom editor that allows users to input and format mathematical formulas.
 - Implemented advertising integration within the website to generate revenue.
 - Conducted research and implemented SEO strategies, including Sitemap and JSON-LD, to improve the website's visibility and search engine ranking.
- Gains:
 - Successfully launched and maintained the websites dicamon.vn and book.dicamon.vn, driving significant user engagement.
 - Achieved an average traffic of 500k visits in the first month

Project: Examon

- Description: Developed exam websites and blogs to provide educational support to students across Vietnam.
 - Technologies: NextJS + Sass + Antd + Zustand + Firebase + Strapi + Appsmith
 - Team size: 5 - Frontend, Backend, Designer, Product Manager, Data Engineer
 - Responsibilities:
 - Collaborated with UX/UI designers to accurately implement design specifications into functional web applications.
 - Integrated and customized a video player to handle YouTube links.
 - Continued to expand the functionality of the CMS built with Strapi, including features such as:
 - Integration API of Optical Character Recognition (OCR) to convert image to text in the editor.
 - Development of course management, document management, and a gift random game system.
 - Utilized Appsmith to create an internal system for organizing exams and compiling sales statistics, streamlining operational workflows.
 - Gains:
 - Successfully launched and managed the website examon.vn, significantly contributing to its operational success.
 - Achieved 1 million impressions within the first 28 days of launch.
-
