SUMMARY

Frontend Developer with 2 years of experience in the educational technology sector, specializing in building user-friendly interfaces and integrating API systems. Proven ability to enhance user engagement and platform performance. Aspiring to become a Fullstack Developer, aiming to build comprehensive web applications by leveraging both Frontend and Backend technologies.

WORK EXPERIENCE

Tiasa Tech JSC - HCMC   Apr 2023 - Present
Frontend Developer

- Collaborate with designers to develop user interfaces for learning websites: Examon.vn
- Collaborate with the backend team to develop user registration, account management, and progress tracking features.
- Built a Content Management System (CMS) using Strapi, allowing content and feature management
- Integrated an API to convert images into text in the CMS editor
- Designed and integrated a custom editor that enables users to input and format complex mathematical formulas
- Used Appsmith to develop internal systems for managing exam data and sales statistics.

Result:
- Successfully developed and launched the Examon.vn platform, achieving over 1 million impressions within the first 28 days of launch
- Increased data entry efficiency by 30%, significantly reduced data processing time.
- Reduced manual task processing time by 40%, providing analytical information to optimize business operations.
- Received positive feedback from users regarding the website's ease of use and efficiency.

Tiasa Tech JSC - HCMC   Dec 2022 - Apr 2023
Intern Frontend Developer

- Researched NextJS and applied it to develop a basic Q&A website featuring search and question-answering capabilities.
- Conducted research and implemented SEO strategies, including Sitemaps and JSON-LD, to improve website visibility and search engine rankings.
- Developed a Dicamon website that averaged 500k visits in the first month

Result:
- Dicamon.vn website achieved an average of 500 thousand visits in the first month
- Received positive feedback from users regarding the website's interaction and efficiency.
- Improved the website's ranking on search engines, leading to increased traffic and online presence of the website.
